

Progress Report

Team Formation

We found each other and decided to form a team.

Team Contract

Created team contract for meeting times, project expectations, and agreements. Aligned our interests, expectations, and goals in order to prepare ourselves for working together on the project.

Idea Generation

After brainstorming we decided on Lecture Dashboard (the name is still a work in progress). Our initial ideas included an online clicker, a spotify jukebox, and a social connection application for connecting nearby users during free time. We adapted the clicker idea to Lecture Dashboard with the purpose of shortening the time during lecture when students are confused.

Idea Refinement

Made Context diagram and defined Concepts.

Pitch Creation

Met for 4 hours and produced beautiful Keynote presentation.

Pitch Practice

Practiced Pitch for 45 minutes.

Pitch

Pitched idea in class (performed pitch in 6.170 on Wednesday as well).

Concept Modification/Exploration

Discussed differing potential focuses for concepts.

Overall Progress

Project is on track. Still figuring out some details of design, but we are confident in our ability to execute well and on time.
