

Agenda

- Talk about progress
- Is orb a good idea or great idea?
 - Basically, is it ok to take a long shot that's really cool and will teach us a lot, even if there are simpler features that fulfill purposes just as well?
 - RESTful API for IoT
 - Is it ok to "Wizard of Oz" the demo?
 - Not sure if we'll be able to grab IP of orb to communicate
 - Actual functionality will be there
- Is commentary worth doing?
 - Might fulfill the purposes, but won't teach us much
 - More CRUD
 - Design isn't very exciting/revolutionary
 - Adds security concerns
 - anonymity
 - user abuse
 - Lecture interruptions
 - sensing
- Possible additional features?
- How do we separate the API for collaboration?
- Discuss whether our project task separation is fine?
- Socket + Routes Implementation Overview
