

# Progress Report

## **Design Doc**

Met this week to write our design doc. Talked through our project, our ideas and purposes, possible features. Ended up with a solid document that we are all proud with.

## **Teamwork Plan**

Also wrote our teamwork plan this week. No unexpected surprises came up in discussion and we're all confident in our roles and ability to complete our work.

## **Kulpreet is a Boss**

He's already implemented all the parts assigned to him.

## **Overall Progress**

On track to have MVP built by Tuesday with all the features we had planned. A couple questions linger for features after the MVP, but this is just a matter of discussing and making some decisions as a team, which we've been very good at thus far.
